Task Description

Biannual training sessions will be organized at EGU and EPSC conferences. These are the main two conferences for the solar and planetary science communities in Europe. The aim of these workshops is four-fold: to showcase the VESPA infrastructure, to train the community, to recruit new users, and to collect feedback from the community. These sessions will be advertised in the conference programs and through Europlanet2020-RI NA2.

Task Pages

EGU 2016
